Junction A6120 / Century Way / Cracked Egg Roundabout

Company Peek Serial No 3243/01 New / Modification

Mains Supply:- 230V/50Hz

High Intensity:- YES

Dimming:- 160V

Engineer R Tallant

Telephone N° 0113 2476779

NOTE TO UTC PERSONNEL

This specification should be used for general purposes only.
The Signal Company documentation should be used for controller operation
and timings unless amended on this sheet as RAM data.

RAM UPDATE (if no data then write NONE)	Reason for change	Initials	Date
Write date current EPROM fitted:-			

Scheme N°:- 712345

ORN:- 573L

Date:- 05/09/07

Issue:- One

Sheet 1 of 27

A63 Selby Rd / Cracked Egg - 573L

A Peek 24R TRX controller serial No 3243/01 from contract 500/3243 shall provide the method of control in this specification.

Method of control

The 5 streams at this roundabout will operate under UTC mode with only CLF as the fallback mode and selected manual the only other mode available . A 32 bit Otu shall provide the control of this junction with the facility to run each stream isolated.

Selby Rd / Thorpe Park puffin – 556L

A link cable from Selby Rd / Thorpe Park Puffin 556L to the Otu in this controller shall provide control at the crossing.

Stream 4 cross linking

There shall be 2 cross linking statements available for stream 4 (which shall be mutually exclusive) with the facility to switch off one or both if UTC control is required on this stream. It shall be possible to isolate this stream whilst still running UTC/CLF with stream 4 running to fixed time max.

Cross linking statement 1

J phase green (stage 8 stream3) shall generate signal **FH9** which shall hold stage 9 stream 4. **FH9** shall be present for the duration of J phase green plus an additional time of initially 6 seconds but alterable via the handset, a 2 second window (alterable via the handset) shall be presented following the removal of **FH9** to service a demand for L phase. This cross linking condition shall have the facility to be switched on and off.

Cross linking statement 2

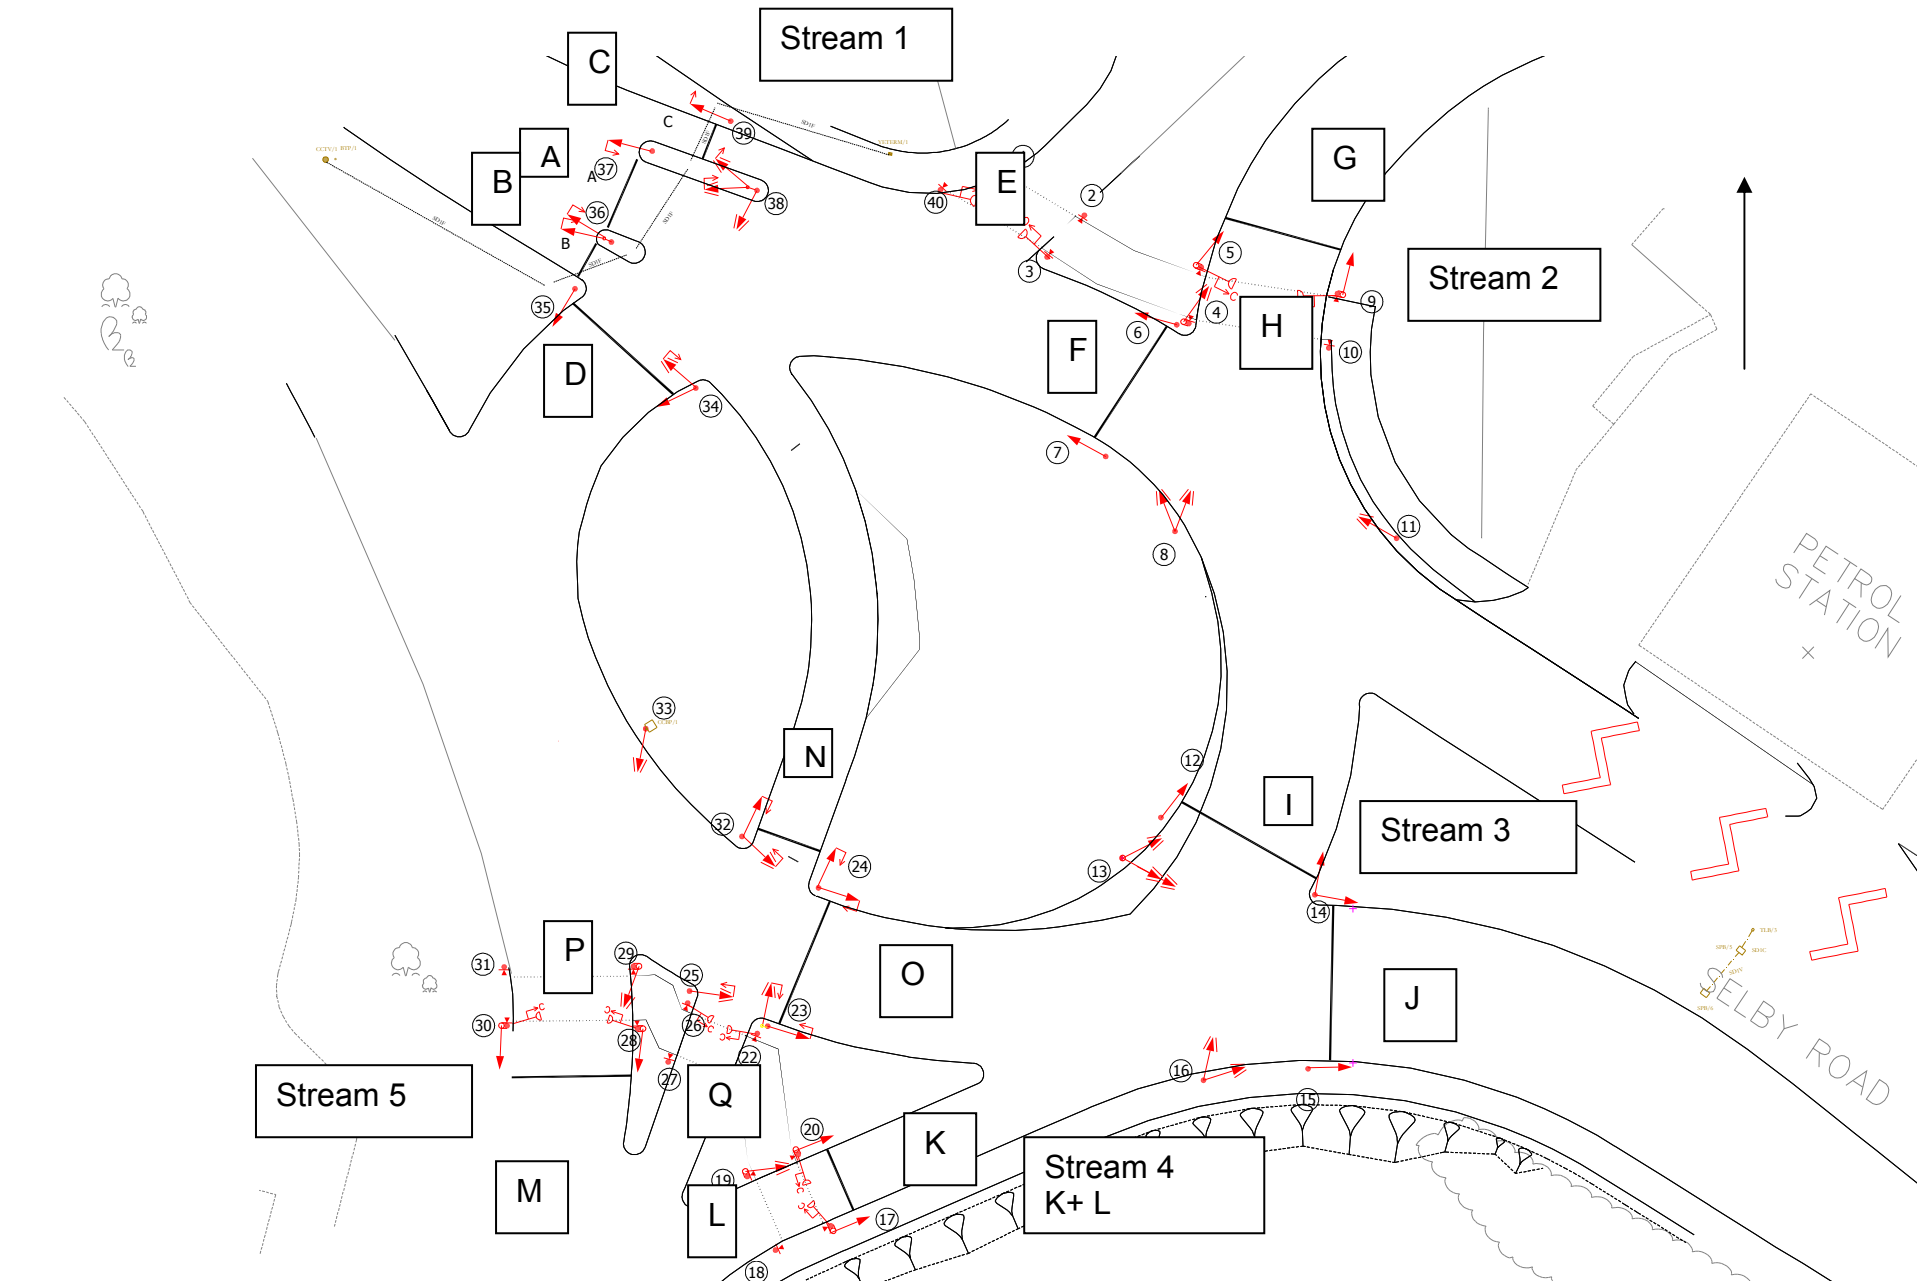

I phase green (stage 7 stream3) shall generate signal **FH9** which shall hold stage 9 stream 4. **FH9** shall be present for the duration of I phase green plus an additional time of initially 6 seconds but alterable via the handset, a 2 second window (alterable via the handset) shall be presented following the removal of **FH9** to service a demand for L phase. This cross linking condition shall have the facility to be switched on and off.

Wait indicators

Only E + L phase pushbuttons will be demand dependant, the wait indicators for pedestrian phases H, P+ Q shall illuminate only when the relevant pushbutton is demanded.

Dummy R

Dummy R stage 2 stream 1 shall generate the G bit reply for stage 2. With a cycle time of 60 secs or less a 1-2 stage move is unlikely, but if a larger cycle time is required then this sequence will be used.

Note 1:- Condition of Appearance

0 - Phase always appears when stage runs.

1 - Phase only appears if demand exists at start of inter-stage

2 - Phase appears, if demanded, at any time up until the end of the stage in which the phase runs

3 - Phase appears, if demanded at any time during the stage up until the window time expires

Note 2:- Condition of Termination

0 - Terminates at end of stage

1 - Terminates when associated phase gains right of way

2 - Terminates when associated phase loses right of way

Note 3:- Phase Types

T - Traffic

P - Pedestrian

F - Filter Arrow

I - Indicative Arrow

L - L.R.T.

S - Switched Sign

D - Dummy

Sheet 26 of 27

SPECIAL CONDITIONING - GENERAL REQUIREMENTS

Mode during which conditions apply :- URBAN TRAFFIC CONTROL / CABLESS LINKING

1-2	$\bar{F}1 \cdot F2$
1-3	$\bar{F}1 \cdot F3$
1-4	$\bar{F}1 \cdot F4$
2-3	$\bar{F}2 \cdot F3$
2-4	$\bar{F}2 \cdot F4$
3-4	$\bar{F}3 \cdot F4$
4-1	$\bar{F}4 \cdot F1 \cdot (D1 + DEM E)$
4-2	$\bar{F}4 \cdot F2$
4-3	$\bar{F}4 \cdot F3$
	Stream 2
5-6	$\bar{F}5 \cdot F6$
6-5	$\bar{F}6 \cdot F5$
	Stream 3
7-8	$\bar{F}7 \cdot F8$
8-7	$\bar{F}8 \cdot F7$
	Stream 4
9-10	$\bar{F}9 \cdot \bar{F}10 \cdot (D10 + DEM L)$
10-9	$\bar{F}10 \cdot F9$
	Stream 5
11-12	$\bar{F}11 \cdot F12$
12-11	$\bar{F}12 \cdot F11$

IF BOOLEAN EXPRESSIONS ARE USED THEN THESE ARE EXAMPLES OF SYMBOLS THAT COULD BE USED:-

F1 - COMPUTER FORCE BIT FOR STAGE 1

D2 - COMPUTER DEMAND BIT FOR STAGE 2

dem C - DEMAND FOR PHASE C

$\overline{\text{ext } C}$ - LACK OF EXTENSIONS FOR PHASE C

max C - MAX TIMER FOR PHASE
